

Earlier this week, the Agencies released the 2020 list of distressed or underserved nonmetropolitan middle-income geographies. These areas are eligible to receive Community Reinvestment Act (CRA) consideration under the community development definition. The listed geographies reflect local economic conditions, including unemployment, poverty, and population changes.

Both this year and the previous years' lists can be found here: <https://www.ffiec.gov/cra/distressed.htm>

We suggest sharing this update with your CRA Officer. CCI is happy to be a resource for your CRA related questions.
